We next the consense to as me any by the sear the control of the c

capital has been more easy of access at Washington than it would have been at Chicago, St. Louis, or Omaha, although these places are, in actual sir-line distance

defeat the demands made, but it may be well before the work of profligate rail road legislation shall be recommenced, to see what the demands thus far are and well the reach of the Government, unstained by the whole resources of the Government, sustained by the whole resources of the Government, sustained by the whole resources of the Gountry.

These Senste bills, introduced as we have said during the very lew days of the late seaton, demand 284,945,080 erres of land, making an aggregate of territory more than seven times as large as the State of New York, to be conferred as a gratuity upon a mere handful of people for the construction of railroads, which, whilst making then enormously rich, would, as they assume, be a public benefit, but which might, for aught they care, be no public benefit whesever. Other bills, similar in character, are said to be matured or rapidly maturing for presented will, if passed, take nearly half as much land as those that have been presented. Those shredy presented will, if passed, take nearly half as much land as the nation powersees of good soil suitable for farms, and the whole area belonging to the Gov. cost equally if not still more tremendous. We had better wait patiently. At present the want of money is a great deal more in-convenient to the people of the United

The newspapers in the fix northwest are getting indignant at the practice, so habitual at Washington, of filling all the offices in the Territories by appointments from the old States. We have contemplated

in the Territories by appointments from the old States. We have contemplated the practice with susazement, but it does not seem to have attracted hitherto the general attention jo which it is entitled from the communities directly conserned. Every Territory, when its territorial officers are appointed, contains a considerable population. Its inhabitants are men, who have taken the earliest opportunities to identify themselves with its fortunes. They are generally an enterprising, energetic, bold and manly people. They are pioneers in the work of establishing civilization and free institutions in remote regions. Some of them are always men of education, enlightenment, and intelligence, who understand their own wants, feelings, and interests of all around them.

But when the time comes for the distri-

ests, and the wants, feelings, and interests of all around them.

But when the time comes for the distribution of the offices of a Territory, please mark her the time comes for the distribution of the offices of a Territory, please mark her they are distributed. They are not given to any of the citizens of the Territory, no matter how worthy and well qualified. Those citizens are not even thought of in the selections made. They are passed by as if they were barbarians. All the offices, from the highest to the lowest, are filled as a maiter of course with persons from the old States, politicians generally who have been defeated as candidates at home, men who can get nothing from the people that know them. They go as Governors, Secretaries, Judges, Surveyors, &c., &c., &c., caring nothing for the communities in which they are to officiate, indulging no thought of establishing permanent residences among them, caring for nothing except to draw their salaries, to speculate in towa lobs, to make corrupt contracts with individuals by laying false claims to influences in high quarters, and to mend their broken political furtures by getting themselves sent to Congress as Senators and Representatives. Thus all the Territories are made hospitals and infirmaries for decayed partizans from abroad. It is time for the whole of this diagusting business to be reformed.

disfranchisement, and the vote of the sheets will be controlled by the respectable.
